Leadership Connection 2018 (15-18 September)

Aligning AONE and Quad Council Nursing Leadership Competencies in an Online Graduate Nursing Administration Program

Melanie Johnson, DNP
Jill Cornelison, DNP
Nancy Owens, DNP, FNP-BC

Department of Baccalaureate & Graduate Nursing, Eastern Kentucky University, Richmond, KY, USA

This presentation illustrates the utilization of a leadership, competency-based clinical evaluation tool for students enrolled in a graduate-level nursing administration program. Emerging nurse leaders must be well prepared to facilitate high quality, safe patient care in an ever-changing healthcare environment. In 2010, the Institute of Medicine (IOM) published a report, The Future of Nursing: Leading Change; Advancing Health, recommending that nursing education provide learning opportunities that promote leadership competencies in decision-making, quality improvement, systems thinking, and team leadership. The Institute for Healthcare Improvement (IHI) Triple Aim highlights priority areas in which nurses must be prepared to lead (IHI, 2018).

The IHI report calls for nurse leaders to be prepared to understand and stratify the needs of their populations, to activate those populations to improve their health, and to map and utilize all of the assets in their communities to achieve improvements in health, experience of care, and costs. The American Association of Colleges of Nursing’s (AACN) Essentials of Masters Education in Nursing (2011) parallels the IOM (2010) and IHI Triple Aim (2018) recommendations by highlighting organizational and systems leadership as core curriculum components. Two nationally recognized professional practice organizations, the American Organization for Nurse Executives (AONE, 2015) and the Quad Council of Public Health Nursing Organizations (Association of Community Health Nursing Educators [ACHNE], 2011) have developed core competencies for nurse leaders that are critical for impacting both population health outcomes and health
systems change. A university-based online Master of Science in Nursing (MSN), with a nursing administration focus, has been designed to incorporate both AONE and Quad Council leadership competency domains. The program embeds a population health focus into the knowledge and skills acquisition processes of advanced practice nurse leaders. Based on the AONE and Quad Council competency domains, a clinical evaluation tool was developed and implemented throughout the curriculum. Students are engaged in a variety of clinical settings that emphasize population health outcomes across health systems. Clinical learning experiences are designed collaboratively among students, faculty, and community partners. Specific competency domains are emphasized at each designated level of the clinical learning experience. Competency in each applicable domain is evaluated from the level of foundational to proficient as the student progresses in clinical knowledge and experience. Upon completion of the MSN Nursing Administration program, experiences have been designed and clinical competency has been evaluated across all domains. Development and utilization of a clinical evaluation tool based on professional competencies provides a means for documenting the student’s progression and growth in both leadership knowledge and skill.

Title:
Aligning AONE and Quad Council Nursing Leadership Competencies in an Online Graduate Nursing Administration Program

Keywords:
Nursing Administration, leadership competencies and student clinical evaluation

**Abstract Summary:**

This presentation describes the development and utilization of a clinical evaluation tool that integrates AONE and Quad Council Nursing Leadership domains in an online Master of Science in Nursing Administration program that. The tool promotes the development of population-focused nursing practice and leadership competency.

**Content Outline:**

I. Introduction

Emerging nurse leaders must be well prepared to facilitate high quality, safe patient care in an ever-changing healthcare environment. Landmark reports from the Institute of Medicine (IOM), the Institute for Healthcare Improvement (IHI), and the American Association of Colleges of Nursing (AACN) charge the nursing profession to prepare advanced practice nurses to lead population and health-system improvements.

II. Clinical Evaluation Tool

Faculty within an online university setting developed a comprehensive clinical evaluation tool for graduate nursing students. The tool was constructed using the AONE and Quad Council of Public Health Nursing organizations’ identified leadership competencies.
a. The evaluation tool provides a means to document advancing and progressive leadership skill and knowledge attainment across varying leadership domains. Nursing Administration student competencies are evaluated at the end of each clinical or preceptorship rotation.

b. The leadership domains also provides a framework for faculty and students to develop and guide individualized clinical learning experiences across the curriculum.

III. Faculty and Student Engagement

a. The clinical competency development process and corresponding evaluation tool promotes interprofessional collaboration among graduate-nursing faculty and students across diverse health systems.

First Primary Presenting Author

**Primary Presenting Author**

Melanie Johnson, DNP
Eastern Kentucky University
Department of Baccalaureate & Graduate Nursing
Associate Professor; Program Coordinator
Richmond KY
USA

**Professional Experience**: Associate Professor; Program Coordinator for MSN Nursing Administration Program at Eastern KY University, Department of Baccalaureate and Graduate Nursing; Former Director of Public Health Nursing-Madison County Health Department, Richmond, KY; Nurse Consultant, KY Department of Public Health, Frankfort, KY

**Author Summary**: 25 years experience speaking and presenting at state and national nursing practice & leadership conferences on the subjects of public health nursing, nursing administration, health systems quality improvement, and interprofessional collaborative practice

Second Author

Jill Cornelison, DNP
Eastern Kentucky University
Department of Baccalaureate & Graduate Nursing
Associate Professor
Richmond KY
USA

**Professional Experience**: Over 40 years of nursing experience including nursing leadership and nurse executive positions. Faculty member at Eastern KY University, teaching leadership and evidence-based nursing practice at the baccalaureate, master, and doctoral levels.

**Author Summary**: Presenter at state & national meetings on the subject of Evidence-based nursing practice; Evidence-based nursing practice consultant. Serve in several leadership positions including President of Theta NU and Secretary of the Bluegrass chapter of the Kentucky Nurses' Association

Third Author

Nancy Owens, DNP, FNP-BC
Eastern Kentucky University
Department of Baccalaureate & Graduate Nursing
Associate Professor
**Professional Experience**: 36 years nursing experience with 30 years spent as a nurse educator; Currently an Associate Professor in a Baccalaureate & Graduate Nursing program. Currently practices as a Family Nurse Practitioner in a rural health clinic.

**Author Summary**: Presentations include Nurse Retention Methods and academic practice partnerships in rural southeastern Kentucky. American Heart Association Regional Faculty and Emergency Cardiac Care Committee a member for a 5-state region.
