## Contents

Foreword ................................................................. xiii  
Introduction ............................................................ xv  

### PART 1  THE MECHANICS OF FLIGHT    1

1  The Changing Face of Healthcare: How Can We Change With It?  ........................................... 3  
   Influencing Forces in Healthcare ................................................. 4  
   The Important Role of Nursing .................................................. 7  
   The Power of the Interprofessional Team ................................... 9  
   The Changing Face of Organizations ........................................ 11  
   Forces Affecting Healthcare Delivery ........................................ 13  
   The Changing Landscape of Healthcare Finance ...................... 19  
   Adapting to Change ................................................................. 19  
   References .............................................................................. 20  

2  The Evolution of Governance Models .................................................. 23  
   History of Shared Governance ................................................... 24  
   Professional Governance Concepts ........................................... 25  
   Current Influences Affecting Shared Governance ...................... 28  
   Challenges With the Traditional Model ..................................... 29  
   The FLIGHT Model: A New Approach to Professional Governance .................................................. 33  
   References .............................................................................. 34  

### PART 2  MASTERING AERODYNAMICS    37

3  The FLIGHT Model: An In-Depth Look ............................................... 39  
   What Makes the FLIGHT Model Innovative? ............................... 41  
   The Four Pillars of the FLIGHT Model ...................................... 43  
   The FLIGHT Model in Action: Project Flow .............................. 48  
   Role Clarification ...................................................................... 51  
   References .............................................................................. 57
