Competency-based education (CBE) has the potential to be a powerful lever for access and equity in higher education. Integrating multiculturalism into CBE programs can further promote equitable outcomes. Students need to have the support for their unique perspective and respect for what they understand within the context of culture. To affect this type of inclusion a model needs to be established that can be utilized for all courses and programs.

In an effort to develop a University wide scalable model to identify and revise courses with achievement gaps, several steps were developed. The steps included frameworks for identifying root causes of inequitable outcomes, and proposed solutions to address these challenges. To take this to the next step a standardized analysis was developed. The project combined elements from the proof of concept gateway course analysis and the Pyramid of Inclusion model. By applying specific strategies, we were able to provide replicability and scalability to curriculum change processes along with the application of the framework and strategies across courses and programs.

The Pyramid of Inclusion model for multicultural competency-based education provided actionable strategies through the design of environments of inclusion and integrated multicultural concepts for CBE. The pyramid of inclusion model emphasizes the importance of what we teach, how we teach, how we assess and support learning from a multicultural standpoint illustrating a full range of multicultural strategies.

An actionable approach in the integration of multicultural concepts into competency-based education is offered by examining gaps that exist in the performance of non-Caucasian learners in academic settings. The strategy presents a model to support the design of environments of inclusion and integrates multicultural concepts into CBE programming. This project is key to a University’s mission in addressing critical and relevant issues related to a diverse learner population and gaps in diversity, equity, and inclusion within the curriculum.

Abstract Summary:

Competency-based education (CBE) has the potential to be a powerful lever for access and equity in higher education. Integrating multiculturalism into CBE programs can further promote equitable outcomes. Addressing critical and relevant issues related to a diverse learner population are critical considerations for academic program success.

Content Outline:

Competency-based education (CBE)

- Powerful lever for access and equity in higher education.
- Integrating multiculturalism

University wide scalable model

- Identify and revise courses
- Several steps were developed including frameworks
- Identifying root causes of inequitable outcomes

Proposed solution to address these challenges
• Gateway course analysis and the
• Pyramid of Inclusion model
• Provide replicability and scalability

Application of the framework and strategies across courses and programs

• The Pyramid of Inclusion model for multicultural competency-based education
• Provided actionable strategies
• Inclusion and integrated multicultural concepts
  o emphasizes the importance of what we teach, how we teach, how we assess
  o illustrating a full range of multicultural strategies.

Actionable approach using multicultural concepts for competency-based education

• Non-Caucasian learners in academic settings
• Strategy presents support for the design of environments of inclusion

Conclusion: University’s mission supports the CBE

First Secondary Presenting Author

**Corresponding Secondary Presenting Author**

Lydia L. Forsythe, PhD, MSN, MA
Londes Strategic Healthcare Consulting; Capella University
Consulting Group; School of Nursing
President of Londes Strategic Healthcare & Faculty
Oklahoma City OK
USA

**Author Summary:** Dr. Forsythe is an active faculty and consultant in academia and healthcare. She has 10 years of curriculum development experience and is a CCNE evaluator and team leader.

Second Primary Presenting Author

**Primary Presenting Author**

Constance Hall, EdD, MSN, BA, RN
Capella University
Department of Nursing
Graduate Program Chair
Capella Tower
Minneapolis MN
USA

**Author Summary:** Dr. Hall has been speaking at conferences for over 20 years. She has over 20 years of varied and robust experience as a leader in academia. She currently speaks at both internal and external conferences about a variety of topics.
Author Summary: Dr. Lowry has presented at numerous conferences on multiple topics. She enjoys her time engaging with peers with scholarly presentations. She has presented in the academic conference setting in the state and national levels.
