Title:
SPECIAL SESSION: Advancing Research Using App-Based Innovations

Keywords:
apps, innovation and research

Description/Overview:
Current information on nursing research indicates that there are a variety of barriers in conducting comprehensive, tailored research. This session will explore the use of app-based solutions for research to expand the scope with improved ability to consent, sample size, and overall participation.

Organizer
Melissa A. Stec, DNP, CNM, APRN, FACNM, FANN
SUNY Downstate College of Nursing
Professor, Associate Dean of Evaluation and Educational Innovation
Brooklyn NY
USA

Author Summary: Dr. Missi Stec is Professor and Associate Dean for Evaluation and Educational innovation at SUNY Downstate. She received her MSN and DNP from Vanderbilt. Her research focuses on technology integration in nursing education, technology infused pedagogy and translation of technology into practice and has been published and presented both nationally and internationally.
