**What do we teach our daughters?
Nurses, women, and prosperity**

Nurses & Confidence

- Have you or other nurses you have known ever passed up opportunities because you felt unsure or insecure?
- What would have helped most in those situations?

Nurses & Mentorship

- Mentorship is a key driver for career success, yet women can have a harder time than men identifying mentors, especially ones with influence.
 - › What is your own experience in finding mentors?
 - › How has that relationship impacted your life or career?

Nurses & Gender Biases

- How have gender biases impacted your own career or the careers of other women nurses you know?
- Have you noticed any *changes* in the types of biases and challenges you encountered when you first started your nursing career, compared to now?

Nurses & Gender-based violence at work

- Sexual violence and harassment at work is widespread, often hidden, and disproportionately affects women health workers.
- What needs to be done to address this problem?

Nurses & Allies

- What can men and women do to be better workplace allies for women at various stages of their nursing careers?

Nursing & the future

- How might the current global pandemic, and the world's reliance on nurses more than ever, present an opportunity for positive changes in our profession for generations to follow?
