Organizer

Jason E. Farley, PhD, MPH, ANP-BC, FAAN
Johns Hopkins University
School of Nursing
Associate Professor
Baltimore, Maryland
USA

Author Summary: Jason Farley is both a School of Nursing faculty member and a nurse practitioner in the Division of Infectious Diseases within the Johns Hopkins AIDS Service. He also holds an adjunct appointment on the faculty at the University of KwaZulu Natal, South Africa. His projects include an evaluation of treatment outcomes in patients with multidrug-resistant tuberculosis (MDR-TB) with a high HIV/AIDS prevalence in South Africa in collaboration with the Medical Research Council of South Africa.

Organizer

Vanora Hundley, PhD, MSc, BN, RN, RM, RGN
Bournemouth University
Faculty of Health & Social Sciences
Deputy Dean for Research & Professional Practice & Professor of Midwifery
Bournemouth
United Kingdom

Author Summary: Vanora Hundley is Professor of Midwifery and Deputy Dean for Research at Bournemouth University, England. She is a registered nurse (in both UK and Texas, USA) and a registered midwife. With three decades of research, Vanora is an internationally renowned nurse and midwife researcher. She conducted one of the

first randomised controlled trials of midwife-led care, which has helped to shape the provision of maternity care in the United Kingdom and globally

Organizer

Susan M. Latter, PhD, PG, Dip, BSc (Hons), RGN
University of Southampton, England, UK.
School of Health Sciences
Professor of Nursing
Highfield
Southampton
United Kingdom

Author Summary: Sue is Professor of Nursing at the School of Health Sciences, University of Southampton, England. Her research programme involves interdisciplinary collaborations with medicine, pharmacy, social scientists and economists focused on developing and evaluating interventions that optimise prescribing of medicines by health professionals, and medicine-taking by patients, as well as promoting self-management. Her current research interests include evaluating nurse and pharmacist prescribing and promoting self-management of medicines by patients and carers, including end-of life medicines optimisation.

Organizer

Karen Monsen, PhD, RN, FAMIA, FAAN
University of Minnesota
School of Nursing
Professor
Minneapolis, Minnesota
USA

Author Summary: Karen Monsen is Professor and Chair of the Population Health and Systems Cooperative at the University of Minnesota School of Nursing, where she directs the Center for Nursing Informatics and coordinates the Nursing Informatics DNP Specialty. She directs the Omaha System Partnership, a practice-based research network and data collaborative, within the Center for Nursing Informatics.
