Concept Mapping Anemia: Transferring Ownership in Learning to the Nursing Student

By: Jaclynn Huse, PhD, RN, CNE
Professor of Nursing
Southern Adventist University

**DIRECTIONS**
- You will be working in groups of 2-3 people to develop a concept map that compares numerous types of anemia.
- There are similarities and differences between each of the anemias; use your textbook and organizing these diseases into categories and then in the center, we will put the common S/S's and Tx.

**MAP THESE ANEMIA'S**
- Sickle cell anemia
- Chronic renal failure
- Aplastic anemia
- Pernicious Anemia
- Folic acid deficiency anemia
- Iron Deficiency Anemia
- Thalassemia
- Hereditary Spherocytosis
- Glucose-6-Phosphate Dehydrogenase Deficiency
- Hemolytic Disease of the Newborn
- Antibody-Mediated Drug Reactions
- Acute blood loss
