Facts:
- Clinical sites are becoming harder to secure.
- Patients are being discharged quicker.
- The general population is ageing.

Facts:
- Healthcare issues once regarded as acute events are now viewed as chronic illnesses.
- Education, Health Promotion and follow-up are needed for our clients in the environment where the healthcare system expects them to function and live.

Solution
We chose partnering with a Community Agency.

Self-efficacy is defined by psychologist Albert Bandura as one’s belief in one’s ability to succeed in specific situations.

Self-efficacy the journey continues
