Claudia K. Y. Lai, PhD, RN  
School of Nursing, The Hong Kong Polytechnic University, Hong Kong SAR, China
Objectives

1. Purpose is to introduce the Global Leadership Mentoring Community of STTI.
2. Discuss strategies for developing global nurse leaders.
3. Describe the process of global leadership mentoring through an online or virtual technology.
Why is this needed?

- Nurturing future global leaders in nursing requires engagement with colleagues from other countries and contexts.
- It requires a deliberate and longitudinal leadership development process mentored by nurses committed to serving as role models.
- We experienced such a process and desire to sustain and offer it for others.
Sigma Theta Tau International The Honor Society of Nursing

- Transformational leadership empowers nurses.
- Role models are needed where nurses practice, teach, study, and influence policy.
- Organizations with global mission provide opportunity for nurses’ professional growth in leadership.

Serve locally, transform regionally, lead globally

What is leadership in our global context?

How do we develop it across global nursing environment?
Community Goals

1. Discuss leadership in their own contexts,
2. Describe their leadership activities,
3. Describe their leadership values,
4. See the role of global leadership in building nursing science,
5. Describe the role of STTI in building leadership for nursing, and
6. Contribute to leadership initiatives locally and internationally.
Leadership Activities

• Identify personal goals and plans
• Discuss international nursing perspectives including world health and nursing organizations
• Increased involvement in local chapter in leadership roles
• Grow in relationship with a global nurse colleague
Personal Leadership Goals for Mentees

- Consider own goals and aspiration for global nursing leadership development
- Become an integral and valued member of a global nursing community through active participation in this Community
- Master the competencies needed when engaging with other local, regional or global nurse leaders in dialogues and deliberations on professional issues of own interest
- Rise up to leadership challenges through taking up local, regional or global nursing leadership roles
- Meet own learning and development goals through the facilitation of own global mentor
Global Leadership Mentoring Community

Discussion?

• How does this apply to you? Here? Now?

• How may it apply to nursing in the future? To You? In a Global Environment?

• How is the future a balance of challenge & opportunity?

• What supports can strengthen Your leadership capacity?
Wrap up

• Why does leadership matter?
• Who does leadership and when?
• Who are your role models?
• Where can you find supports for growth?
• Where can you support others?

Thank you!
