

# Care Zones Staffing Model: Solving Workflow Barriers to Improve Patient and Nurse Outcomes

Emory University Hospital  
Atlanta, Georgia

Sigma Theta Tau International  
Honor Society of Nursing®

# Learning Outcomes

- I. Review Care Delivery Model Framework
- II. Identify Problems
- III. Discuss Design of Care Zones Assignment
- IV. Discuss Benefits and Outcomes of Care Zones Assignment
- V. Review Care Zones Applications & Implementation

# Setting

- 24 Bed General Medicine Unit
- High Acuity Complex Patients
- High Volume Patient Turnover
- Nurse/Patient Ratio 1:4 or 1:3
- Nurse Tech Patient Ratio 1:8-1:12
- 2 Hospital Medicine Teaching Service Teams Rotate Monthly

# Accountable Care Unit (ACU™)

A geographic inpatient area consistently responsible for the clinical, service, and cost outcomes it produces.

## ACU Features:

- Unit-Based Patient Teams
- Structured Interdisciplinary Bedside Rounds (SIBR™)
- Unit-Level Performance Reporting
- Unit-Level Nurse and Physician Co-Leadership

# Synergy Model

The Synergy Model represents a patient's needs based on the patient's characteristics, matched with and a nurse's practice competencies thus producing optimal patient outcomes (Curley, 1998).

# Problems Identified

- RN patient assignments for the on-coming shift were based on synergy acuity that had negative staff feedback. RN staff raised concerns about “unfair” and/or “inconsistent” assignments by charge nurses
- Staff members not geographically located near assigned patients
- RN’s reporting off at shift change to multiple staffmembers
- Staff members unnecessarily crossing paths throughout shift
- Inter-professional team rounding crossed multiple paths

# Typical Shift Assignment Pattern

RN 1	RN 2	RN 3	RN 4	RN 5	RN 6	RN 7
40	31	32	33	34	37	44
46	38	35	36	50	42	51
49	48	52	47	56	54	53
	55		58		57	

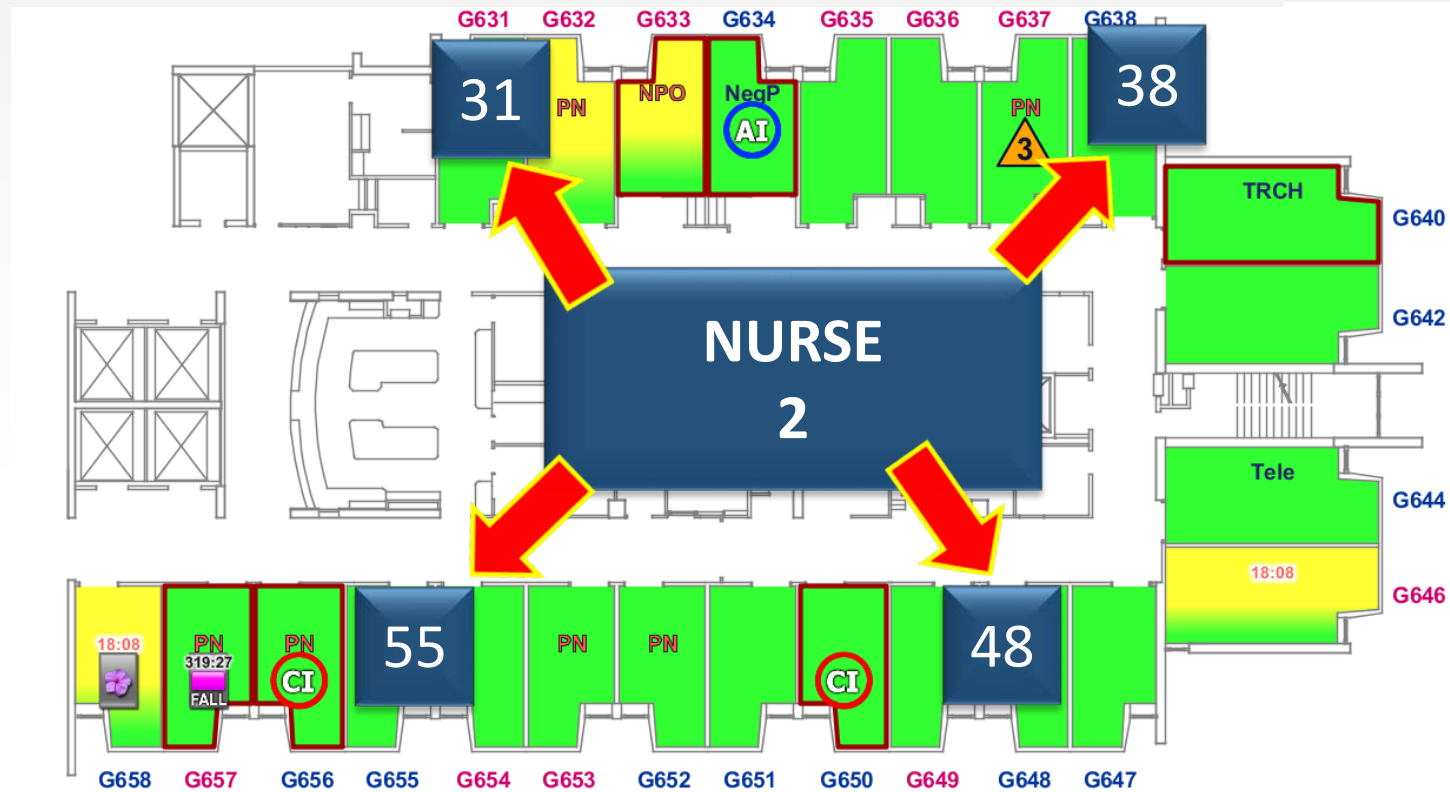

# Typical Shift Assignment Pattern

RN 1	RN 2	RN 3	RN 4	RN 5	RN 6	RN 7
40	31	32	33	34	37	44
46	38	35	36	50	42	51
49	48	52	47	56	54	53
	55		58		57	

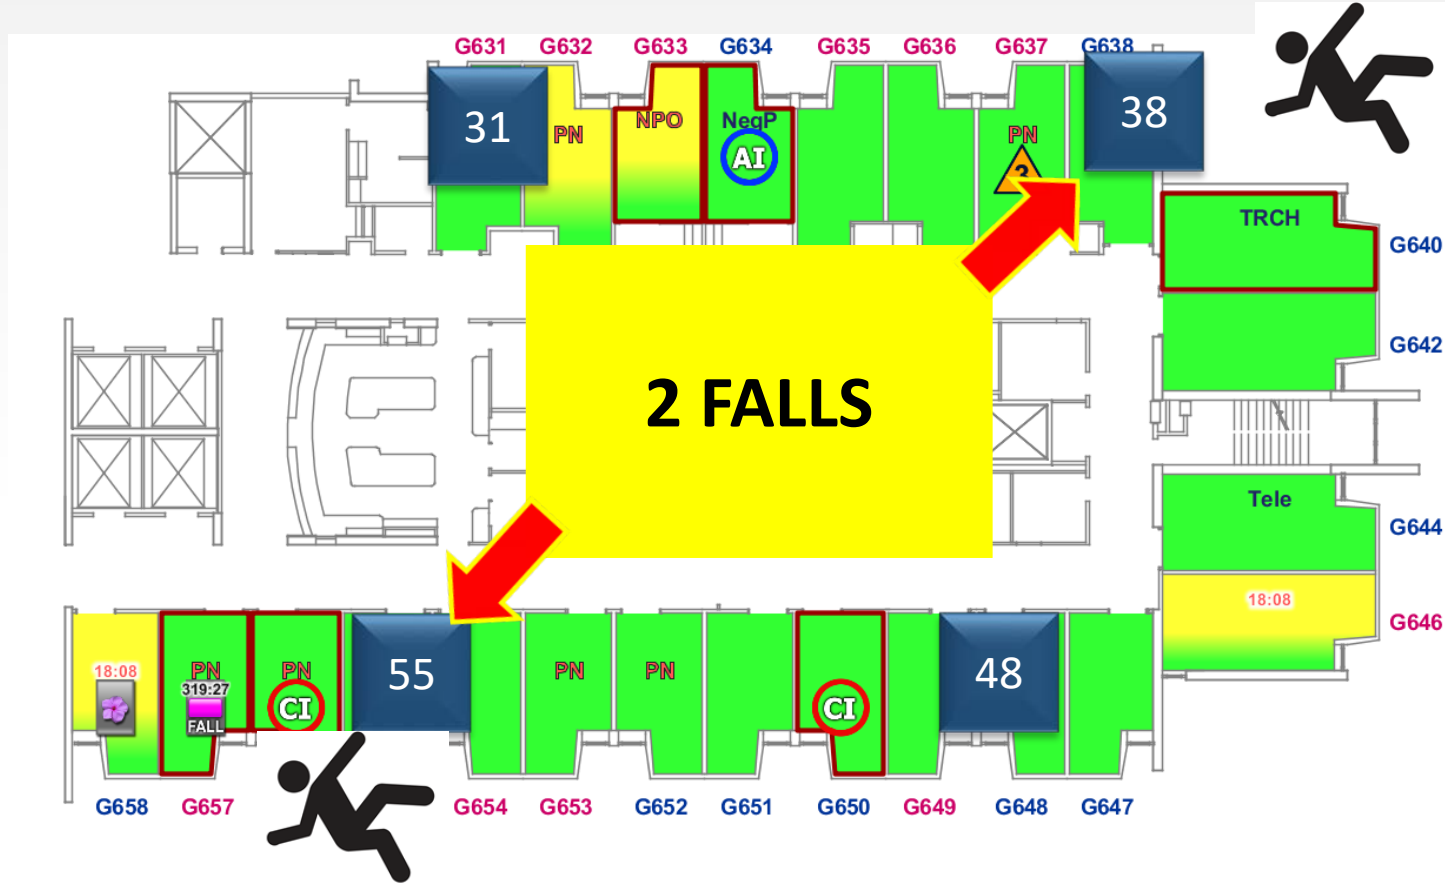

# A Closer Look into a Nurse's Assignment

# Leading to Patient Impact

# Goal

Promote an efficient staffing assignment model that produces favorable outcomes.

# Search for Evidence Based Practice

## The University Of Michigan Health System

- Increased nurse satisfaction
- Increased patient satisfaction
- Decreased call lights
- Decreased patient falls
- Decreased incremental overtime

(Friese et al., 2014)

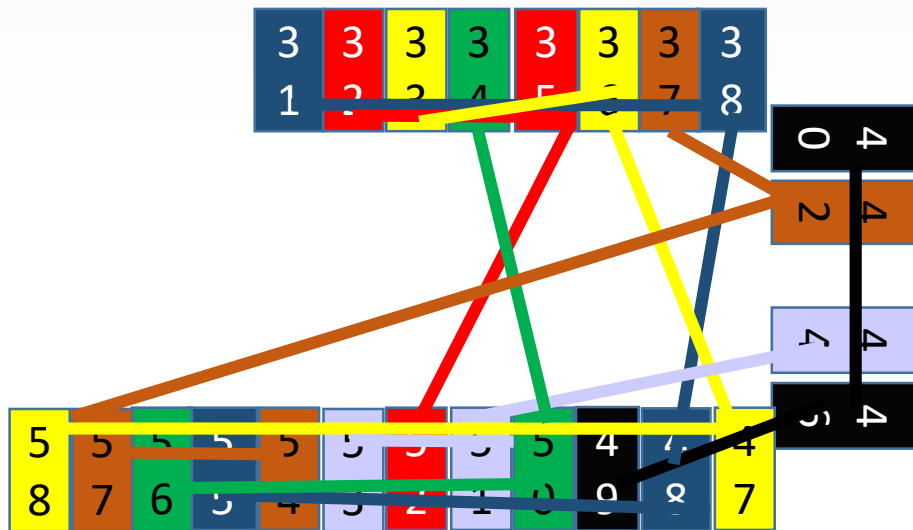

## University of Pittsburgh Medical Center Shadyside

- Patient satisfaction with nurses keeping them informed
- Increase promptness responding to patient calls and attention to patient/personal needs

(Donahue, 2009)

# Definition

**Care Zones** are staff assignments that are made based on patient geography, acuity, and skills required of the nursing care team to achieve optimal patient outcomes.

RN 1	RN 2	RN 3	RN 4	RN 5	RN 6	RN 7
31	32	38	42	50	53	54
33	34	40	44	51	52	55
36	35	46	47	58	49	56
	37		48			57

Flexible & Fluid movement within the Care Zones

RN 1	RN 2	RN 3	RN 4	RN 5	RN 6	RN 7

# Patient Fall Data Continued

# Nurse Satisfaction

# Benefits of Care Zones Assignment

- Minimize the impact of subjectivity in staff assignments
- Optimize Bedside Shift Report (BSR) process
- Provide a strong support system and safety net for patients and staff
- Care team is geographically close to assigned patients
- Promote team collaboration between staff members
- Increase patient safety and staff efficiencies in workflow

# Future Care Zones Expansion at Emory

- Easily Replicable and Adaptable to Other Inpatient Settings
- Supports Inpatient Units of Varied Patient Populations
- The New Hospital Tower will utilize the Care Zones Assignment Model
- Other System Entities are Considering Adoption of Care Zones Assignment Model

# Leadership Support: Plan Foundation for Success

- Assess the Culture, Identify Strengths, and Stakeholders Needed for Successful Implementation and Sustainment
- Prepare the Team's Mindset to Demonstrate Dedication and Commitment to the Project's Success
- Enlist the Informal Leaders to Help Advocate, Role Model and Lead the Change
- Shape Your Stakeholders to Instill Commitment, Adherence, and Application

# Needs Assessment

- Readiness Assessment Survey
- Examine Workflow Patterns
- Timeline and Check Points for Rapid Cycle Improvement and Celebrate Milestones
- Utilize the Comfort Level of Staff as a Leverage Point
- Educate to the Cause and Elicit the Buy In
