Title:
AACN Standards for Healthy Work Environments: After More Than a Decade, Where Are We Now?

Keywords:
barriers to nursing practice, healthy work environment and healthy work environment standards

Summary:
Research confirms the inextricable link between healthy work environments and optimal outcomes for patients, healthcare professionals and organizations. Key evidence contributing to the second edition of the AACN HWE standards and perspectives of nurses regarding the health of the work environment and barriers to optimal nursing practice will be discussed.

Final Number:
C 05

Slot:
C 05: Saturday, 18 March 2017: 8:00 AM-8:45 AM
