

Learning Activity:

LEARNING OBJECTIVES	EXPANDED CONTENT OUTLINE
The learner should be able to identify connections between sex motives and specific risk behaviors among girls enrolled in the sexual risk reduction intervention study.	Presenters will provide information and research on the evidence-based intervention, Sex Motives Scale, and sex motives and risk profile data analysis.
The learner should be able to use sex motive and risk profile interaction information to modify future evidence-based interventions regarding sexual risk reduction and/or adolescent health.	Presenters will provide information and research on sex motives and risk profile data analysis, and opportunities and suggestions for future intervention tailoring.
