Learning Activity:

LEARNING OBJECTIVES	EXPANDED CONTENT OUTLINE
Describe clinicians' and bi-cultural workers' views on the benefits and challenges in using co-assessment in mental health assessments.	The learner will gain knowledge about how co-assessment closes the cultural barrier and improves the assessment process and provides accurate data reflective of cultural norms in mental health patients/clients.
Provide nurses and health professionals an innovative assessment (co-assessment) model that facilitates culturally inclusive mental health assessments with multicultural communities.	The learner will gain knowledge about an alternative approach to assessment of multicultural mental health patients and clients. The learner will understand that the co-assessment model can provide a cultural lense that facilitates a holistic mental health assessment.
