

Learning Activity:

LEARNING OBJECTIVES	EXPANDED CONTENT OUTLINE
1. The learner will be able to understand factors that influence the development of student cultural competence.	1. Introduce the study problem to show the need for nursing faculty to effectively prepare nursing graduates to become more culturally competent nurses throughout the nursing curricula.
2. The learner will be able to duplicate the study methodology for further research in identifying cost-effective strategies for facilitating student cultural competence.	2. Explain the methodology used to conduct research for identifying factors that significantly influence student cultural competence.
3. The learner will be able to appreciate cultural competence is an on-going learning process rather than an outcome for students.	3. Provide suggestions and recommendations for further research and nursing education in developing teaching and learning strategies for on-going development of cultural competence in undergraduate nursing students.
