

Learning Activity:

LEARNING OBJECTIVES	EXPANDED CONTENT OUTLINE
The learner will be able to design a successful global health experience by addressing integration of institutional mission, values, and curriculum.	The determination of values and institutional mission statement provide the essential philosophic guidance for ensuring support and sustainability. The development of cultural competence includes: self-beliefs, acculturation and assimilation, racism, prejudice, stereotyping and culture shock.
The learner will be able to analyze major components of an immersion experience which fosters cultural competence while meeting identified didactic and clinical course objectives.	Comparing and contrasting curriculum course objectives for appropriate matching with the global health experience objectives.
