

Learning Activity:

LEARNING OBJECTIVES	EXPANDED CONTENT OUTLINE
The learners will be able to explain the importance of education to improve their awareness of endocrine disruptors.	Education for young women needs to contain strategies to increase their cognitive levels and to encourage them to adopt behaviors that are protective of their reproductive health.
The learners will be able to explain relationships between endocrine disruptors and reproductive health impacts in young women.	Endocrine disruptors induce endocrine imbalances and are known to associate with precocious puberty, implantation failure, endometriosis, and breast and endometrial cancer.
