

Learning Activity:

LEARNING OBJECTIVES	EXPANDED CONTENT OUTLINE
1. Describe the use of a technology-based strategy, live interprofessional case-based webinars with follow-up facilitated discussion and curriculum weaving of content to teach interprofessional collaborative practice in an online nurse practitioner program.	A. Brief discussion of importance of IPCP to safety and quality; thus vital for nurse practitioners to be competent in this area. (cite NP competencies) B. Brief discussion of the Core competencies for interprofessional collaborative practice (IPCP) C. Description of the weaving of IPCP content throughout our NP curriculum and process of curriculum mapping. D. Description of development and implementation of live interprofessional webinars with facilitated discussion.
2. Discuss the repeated measures evaluation of the core competencies of interprofessional collaborative learning in an online NP program to reflect the areas of learning needs and competency attainment.	A. Describe plan for use of IPEC Competency Self-Assessment Tool – Version 1 in a pre-post, repeated measures design (on entry into the program and at designated evaluation points) B. Discuss findings of this evaluation in terms of learning need assessment and competency attainment. C. Briefly discuss qualitative and anecdotal evaluations by students and faculty.
