

Learning Activity:

LEARNING OBJECTIVES	EXPANDED CONTENT OUTLINE
Describe the prevalence of maternal death in the U.S. and worldwide, and the factors that contribute.	Statistical information from CDC and UNICEF.
Identify the potential consequences and family dynamics post-maternal death.	Interpretive phenomenologic analysis and excerpted transcripts of in-depth interviews with fathers and other family members following maternal death in childbirth.
Identify pre- and post-birth implications for health care providers.	Strategies to increase paternal involvement in pregnancy, identify high-risk mothers, and provide support.
