

**Learning Activity:**

<b>LEARNING OBJECTIVES</b>	<b>EXPANDED CONTENT OUTLINE</b>
Identify HRQoL concerns reported by people with schizophrenia and discuss their implications for research and practice.	Poster will include a list of HRQoL concerns reported by people with schizophrenia.
Discuss the potential of computerized lexical analysis to investigate HRQoL concerns in people with schizophrenia.	Computerized lexical analysis methods will be described in poster. This will include existing software including Lexical Inquiry Word Count (LIWC).
Discuss the methods used to integrate qualitative and quantitative findings and discuss the potential of mixed methods to advance the science of HRQoL.	Methods to quantitate qualitative findings as described by Sandelowski (2001) will be presented. The convergent design using a joint display as described by Creswell (2015) will be presented.
