

**Learning Activity:**

| <b>LEARNING OBJECTIVES</b>  | <b>EXPANDED CONTENT OUTLINE</b>  |
|---|--|
| The learner will be able to understand the characteristics of perceived fatigue among patients with colorectal cancer and pancreatic cancer.  | As provided in the poster, pancreatic cancer patients had higher FSI score than colorectal cancer patients.                |
| The learner will be able to know the associated factors among demographic and clinical characteristics, functional lower extremity strength, and grip strength for fatigue in colorectal cancer and pancreatic cancer patients. | The significant associated factor with fatigue was functional status measured by Karnofsky Performance Status Scale (KPS). |
