

Learning Activity:

LEARNING OBJECTIVES	EXPANDED CONTENT OUTLINE
The learner will discuss two of the teaching modalities by which educational content was delivered.	1. Blended learning utilized in developing the educational intervention including self directed modules, technology and conferences/workshops.
The learner will exam two teaching methods that improved learner outcomes in a Substance Use Disorder Research study.	1. Pre- and post- results of valid and reliable survey tool on nurse attitudes towards substance use disordered patients 2. Pass rates on Certified Addictions Registered Nurse examination 3. Self reports from cohort members regarding learning activities
