

**Learning Activity:**

<b>LEARNING OBJECTIVES</b>	<b>EXPANDED CONTENT OUTLINE</b>
The learner will be able to know the trend of body weight in patients receiving radiotherapy for head and neck cancer.	The patients' body weight significantly decreased over time.
The learner will be able to know the influence of mucositis and nutritional support on weight change over time.	The patients with a high grade of mucositis had a lower body weight. The patient with PEG feeding had less body weight loss than oral intake or NG feeding part-way through the radiotherapy.
