"If I just listen to my parents. My life would have been better..."

- Nelia, 17, Manila
Teenage Pregnancy had been a worldwide issue, which raises number of campaigns and projects to lessen this occurrence.

This phenomenon has been increasing in the total number each year.
Philippines has been one of the Asian countries which shares a similar situation. National Demographic and Health Survey (2016), 1 in 10 Filipino Women aged 15-19 is already pregnant with 1st child.
Teenage Pregnancies are often associated with social development issues such as lack of education and poverty.
What are the lived experiences of teenage mothers in Metro Manila?
The study would like to focus on exploring the lived experiences of Filipino Teenage Mothers aged 13-19 in their pre and post natal stage on how they prepare and accept their new roles as mothers.

The study did not compare any the lived experiences of the participants.

The study only observed the philosophical view of the qualitative phenomenological study.

Conclusion
Theme 1: Awakening: Period of Adolescence

Adolescence is a transitional stage of physical and psychological human development that generally occurs during the period from puberty to legal adulthood (age of majority).
When I first got my period, they told me I am already a grown-up. I have seen changes in my body. But, I don't know how to be a real grown-up...

- Abbey, 15, Las Piñas

Metamorphosis of a Girl to a Lady

This in-between place is explored when a girl wants to stay in the clothes of her childhood, and does not understand why this wish would be considered inappropriate in any way.

Her body is that of an adult, but she is also still a child in many ways and she’s not yet ready to wear the clothes of an adult.
Teens were treated as “weak creatures” who had to be shielded from adult sinfulness, whose moral weakness had to be overcome through schooling.

Many beliefs supported this, asserting that a child is naturally wicked, and that education functions as a tool of correction.

"I am confused of what is really right from wrong. I have seen other people doing bad things as if it is right. I am really confused..."

- Carla, 14, Muntinlupa
"I have so many questions in mind about relationships, love, death, and sex. But I am afraid and shy to ask my parents about these things because I know they are not open about it. That is why I find ways to figure it out..."

- Marian, 18, Pasig
A female teenager learns about her new sexual urges from a friend because too much shame surrounded the idea of asking her parents.

"It should not happen. I did something not right. Regrets are felt when it's just too late..."

- Anne, 16, Malabon
Teenage pregnancy is pregnancy in human females under the age of 20 at the time that the pregnancy ends.

This is a very difficult time for a young woman who has only a short time to make a major decision. There is no easy way out.
Parents Know Best

Parents may feel that their daughter is too young to make a wise decision and may bring enormous pressure on her to do what they think is right.

Education is the Key

Sexuality education programs should increase adolescents' knowledge and help them to explore attitudes, feelings, values about human development, relationships, dating, gender roles, sexual orientation, sexual behavior, and healthy sexual decision-making.
Sex Education plays a big role for us youth, so that we will be prevented to do things that could put us in danger. It should be compulsory in the schools. I should have listen to my parents.

- Anne, 16, Malabon

Ifs and Buts

People say "if" and "but" a lot, wishing for things to be different.

There are persons who always regret major decisions that changed their lives. Actions that are irreversible and could never go back.

"Sex Education plays a big role for us youth, so that we will be prevented to do things that could put us in danger. It should be compulsory in the schools. I should have listen to my parents."

- Anne, 16, Malabon
Theme 3: Motherhood: The Mother and the Child

"Maternity is on the face of it an unsociable experience. The selfishness that a woman has learned to stifle or to dissemble where she alone is concerned, blooms freely and unashamed on behalf of her offspring". (Emily Putnam)
State of Ambivalence

Teen mothers are often perceived as having inadequate coping skills and social supports.

There is no doubt that teen mothers are caught between separating from their families and the need for help in child rearing.

Suffering of a Teenage Mom

Among the major troubles teen moms have is not having a job to buy the necessities needed for caring for an infant or young child. Even if they do, teen moms typically work few hours because of school or quit school and earn too little money.
"I don't know how to finance my baby's milk. It's always been. My mom and dad who shoulders everything. I am really ashamed of what's happening..."

- Joyce, 19, Pateros
Baby Mama Vs Marriage

Originally, the term was used by the fathers of illegitimate children to describe the mothers of their children, but the term is now in general use to describe any single mother. Marriage is not always the answer to teenage pregnancy.

Still Alive and Kicking

Despite of what happened, teenage mothers are ready to face all the challenges of raising their children. They believe that everything happens for a reason. They continue fighting and prove that it is not too late to make their lives better.
"I know I will get through all of these. I will be okay and my baby will be okay too..."

- Carla, 14, Muntinlupa
In your darkest hour, never worry that there is no hope for the future. The most extraordinary thing about this life is that YOU are the author of your own destiny, and you get to decide what's in the next chapter.
As teen mothers learned more about themselves and honored the path that called to them, they become stronger. As they spoke up and stated the truth—at first somewhat timidly and then more clearly. They started picking up their broken pieces.
These three things are the strongest weapons the teenage mothers have to withstand to face the challenges of life.

With their respective support systems they were able to surpass everything.
All of the teenage mothers believed that their children will continue their lost dreams and what they had experienced in life will be their guiding principles in raising their children.
"We are okay now. I have already adjusted and I am ready now to be a mother to my baby and my soon to be babies. Thanks to all the people who supported and loved me. Now, I know the ABC's of Motherhood...."

-Joyce, 19, Muntinlupa
• The themes depicted the lived experiences of the participants.

• Gives contribution to raising awareness about teenage pregnancy, pre-marital sex, human adaptation, adjustment, & coping issues regarding early motherhood.

• Teenage mothers are all determined to strive harder to give their children the best things in life.

• Emphasizes the fact that life doesn't end with failure.
