PROBLEM

Nursing is experiencing a “Changing of the Guard”

Scholars are retiring, moving, or dying
  - Contact information is lost or unavailable
  - Difficulty in obtaining permissions

Scholarly contributions may be lost.

Researchers who have developed tools for research that are not under copyright other than the author.

CURRENT PATHWAYS FOR ACCESSING INSTRUMENTS, TOOLS, & MEASURES

RESEARCHER IDENTIFIES RELEVANT INSTRUMENT OR THEORY

PROPOSED SOLUTION

The Virginia Henderson Global Nursing e-Repository offers a viable solution to this problem.

By inviting nursing scholars to place their scholarly works in the e-Repository, along with appropriate instructions and permissions for use, a number of objectives are achieved:

1. The Virginia Henderson Global Nursing e-Repository receives recognition and increased utilization.
2. The scholar’s work is preserved.
3. The mission of STT International, is promoted.
4. Access is provided to other nurse scholars and doctoral students.

BENEFITS

1. Preserves the work of nurse scholars world-wide
2. Supports and advances nursing research and practice
3. Increases access and availability of measurement tools
4. Utilizes a resource that is currently available to anyone (Sigma Theta Tau members and non-members)
5. Will create a community of nursing scholars and enrich the work of current and future nurse scientists.

Instruments? Tools? Measurements?

If you have created one or more of these items that would be useful to other nurses, share it in a free, trustworthy environment all while retaining copyright.
