OVERVIEW
• Cultural competency is essential element of nursing practice (Calvillo et al., 2009).
• BYU College of Nursing requires 9 credits of public & global nursing.
• 90% of students study abroad during nursing program. Courses increase leadership, evidence based research, & translational nursing care.

LEADERSHIP TEACHING
• Students are future leaders in clinical practice & the global community.
• Key to effectual leadership is ability to encourage teamwork & collaboration through difficult circumstances.
• Our college incorporates leadership teaching to train nurses to step up to tough yet important communications, speak their minds and attain positive resolutions.
• Students trained on “crucial conversations”, leadership training, & teamwork quality improvement.

EVIDENCE-BASED PROJECTS
• Evidence-based practice is an amalgamation of research, clinical experience, and patient preferences (Houser, 2015).
• Students integrate care that is respectful of cultures & individual preferences, while delivering best possible treatments.
• Capstone students complete projects that benefit their unit
  o Projects often include educating nursing and other health care staff on delivering culturally-competent care and strengthening inter-professional collaboration.

TRANSLATIONAL RESEARCH
• Working evidence-based research into global setting is challenging.
• With the help of students over last 8 years, our college has performed benchmark anemia prevalence studies in Ghana, Ecuador and India on schoolchildren.
• With this data, we have been able to apply evidence-based interventions to improve health of countless children in these countries.

SUMMARY
• Public and global health education model provides students a transformative educational experience.
• Students experience nursing care in different countries and among culturally diverse populations.
• Experiences help them develop cultural humility & apply cultural knowledge taught in didactic courses.
• A strong foundational learning experience will empower students to become powerful advocates & leaders in global & public health policy.
