Crafting a Personal Legacy as a Global Healthcare Leader

Carol J. Huston, MSN, MPA, DPA, FAAN
Professor Emerita, California State University, Chico
What is your desired legacy as a global healthcare leader?
What is your vision?
What are your goals?
What events would inspire that legacy?
What do you need to do to get there?
What additional knowledge, training, or education do you need to achieve your legacy goals?
Who do you need to connect/network with to make your goals happen? Who is your support?
What potential constraints might interfere with your plan?
How might you proactively minimize those constraints?
What is your timeline for action?
What do you need to do first?
How will you know when you have made a difference?
What are your desired outcomes?
What are the next steps in your personal, global leadership journey?
