Results

Students felt:

- Nightingale was an appropriate theorist to guide a Community Health Nursing course
- Nightingale’s points are relevant today, over 150 years after she wrote *Notes on Nursing*
- It would have been more beneficial to have Nightingale’s theory in detail during their Fundamentals class

Conclusion

- This study revealed that the baccalaureate students had positive perceptions of this CHN course, with some suggestions for the course in the future
- Their positive perceptions and the enthusiasm demonstrated in the focus groups confirmed the researcher’s belief that there is a need for theory, specifically the NEATNP, in a baccalaureate CHN course
